

Jade Bi Disk

Date

ca. 7000 -1000 B.C.

Primary Maker

Unknown

Medium

Jade | Nephrite, with burial accretions of clay and cinnabar

Description

Jade circular 'bi' varies from .2-.3cm thick. Void of decoration. Jade is of mottled brown colors & calcified in places. Cinnabar covers much of one side, small areas of

the other. Outside edge chipped in several places. One hairline crack runs 1.5cm toward center. Appears generally very worn.

Dimensions

Overall: 2 in. (5.1 cm)
