

Threefold

Date

2016

Primary Maker

Melanie (Mel) Douglas

Medium

Kiln formed, cold worked, and engraved glass

Description

The three glass panels are composed of about 25-30 layers of black glass that were fused in a kiln. Though they have entirely flat surfaces, each of the three panels has a trompe-l'oeil effect, created through cutting and engraving patterns in the glass that gives them the appearance of being three-dimensional. Whereas Threefold has a rounded, almost triangular form, Twofold has a rounded, almost rectangular form, and Periphery is almost spherical in form.

Dimensions

13 × 16 × 2 1/2 in. (33 × 40.6 × 6.4 cm)
